

ANGLOGOLD ASHANTI

LOCAL PROCUREMENT UPDATE 2025

Vision

Our vision is to establish a sustainable local procurement program. This vision is underpinned by our values which require us to safely, and ethically, stimulate economic and social development within the communities and countries in which we operate.

Principles of the Local Procurement Policy

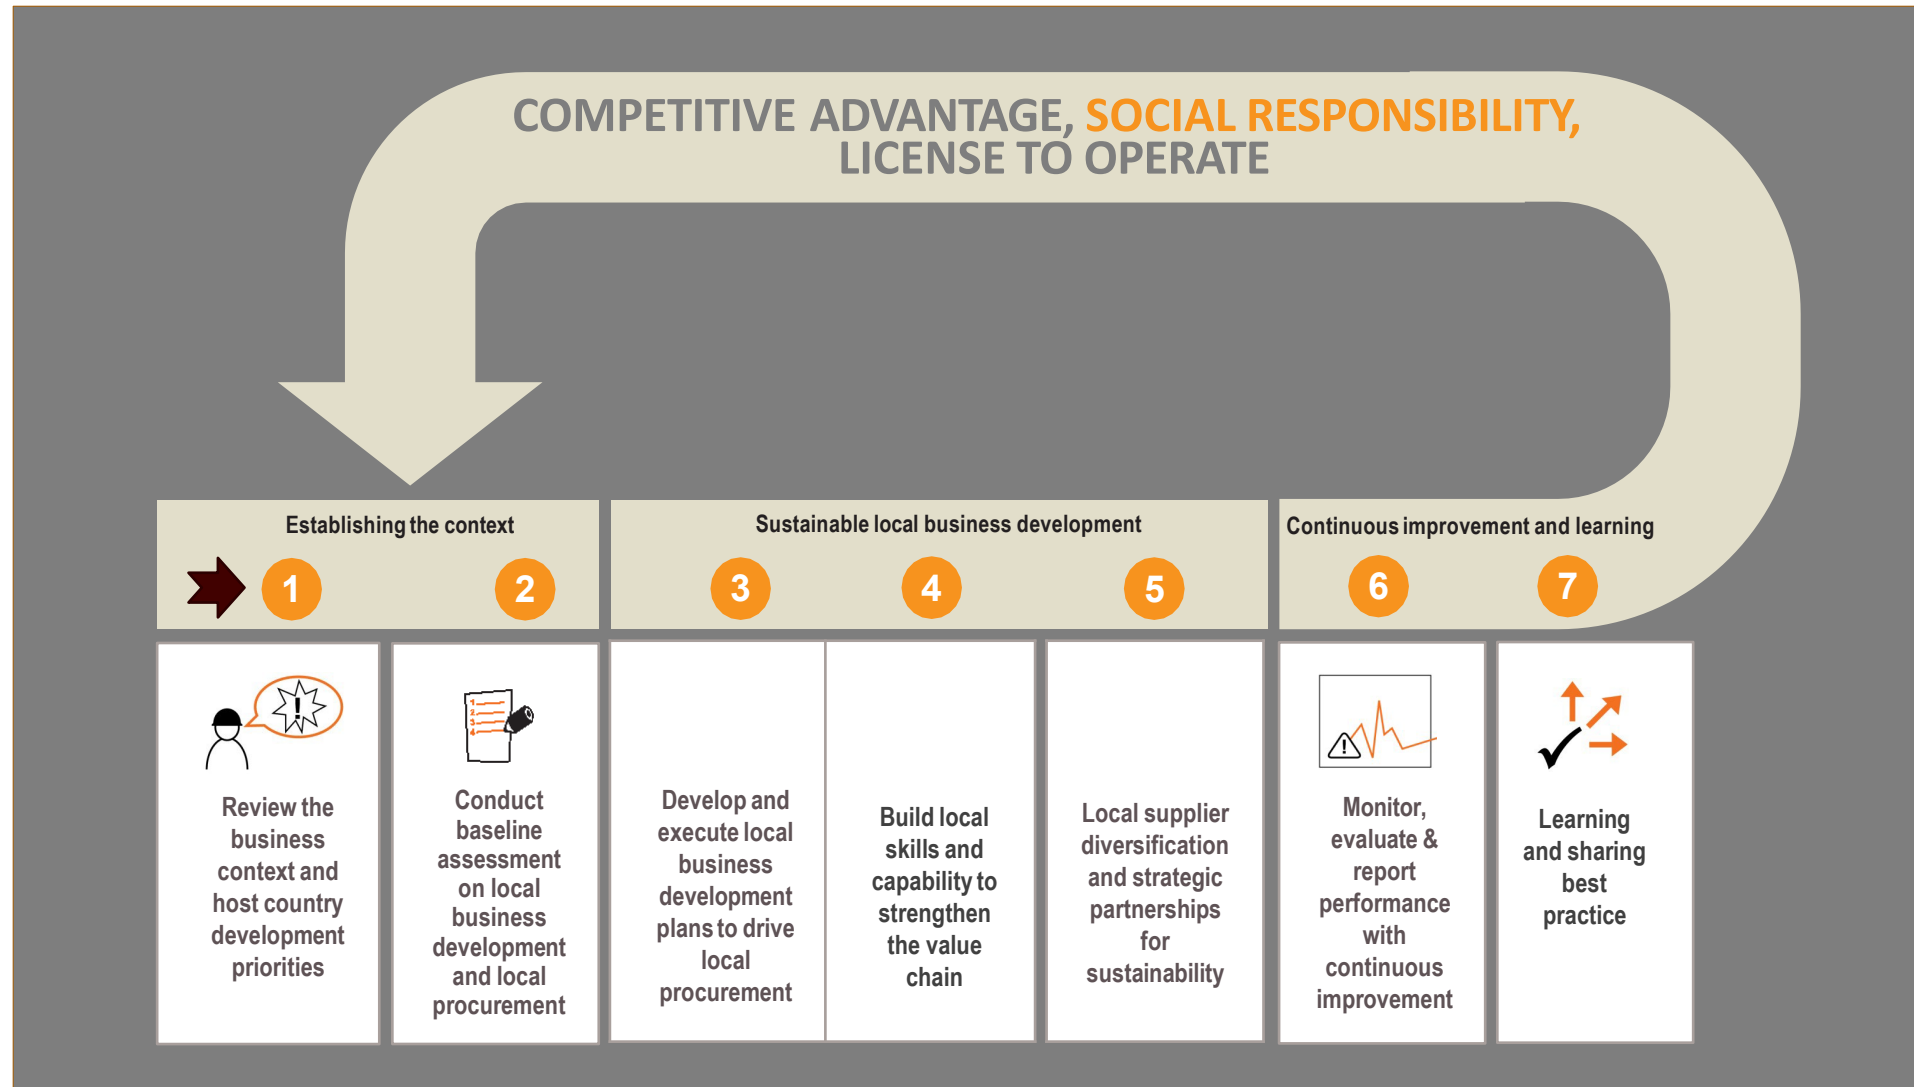

- Ownership of programme at Executive level and global COO.
- As a strategic imperative, we shall make every reasonable effort to procure all goods and services locally.
- Beyond local ownership, we will drive strategic partnerships (such as JV's) which create local employment, skills transfer, and economic value-add.
- We will actively develop local suppliers to create capacity and capability.
- We will seek to create competitive, and diverse options for supply that can sustain beyond life of mine.
- Implementation of ESG initiatives through innovation and collaboration with key stake holders.

Leveraging the successful delivery of OE300

LOCAL PROCUREMENT POLICY

Our vision is to establish a **SUSTAINABLE LOCAL PROCUREMENT** programme underpinned by our values to **STIMULATE ECONOMIC AND SOCIAL DEVELOPMENT** within the communities and countries in which we operate.
